

Operational Report

Efficiency, Food Quality & Profitability with Beyond Oil

Executive Summary

This report outlines the results of the Beyond Oil pilot program, a strategic initiative designed to enhance operational inefficiencies and unlock new levels of profitability, product quality, and team performance.

The findings demonstrate a compelling business case: Beyond Oil is a powerful cost-saving enabler of improved quality, product consistency, and operational excellence, while also enhancing health, sustainability, and profits.

Projected Annual Savings Across 9 Locations

A conservative estimate based on pilot program results
4 vats × 30 L each (120 L total oil capacity)

€300,000

The Operational Challenge

In the high-pressure restaurant industry, operational friction translates directly to lost profit and can negatively impact food quality. This pilot targeted three core areas where daily inefficiencies erode margins and compromise the guest experience:

Degrading Food Quality

As oil breaks down, so does flavor consistency, leading to guest complaints, costly food waste, and damage to brand reputation

Volatile Consumable Costs

Erratic oil prices and high consumption create an unpredictable and significant strain on the P&L.

Inefficient & Risky Labor

The hazardous, multi-hour process of fryer cleaning and boil-outs, oil storage, and oil discard consumes valuable labor, increases the risk of workplace injury, and pulls staff away from value-added, guest-facing tasks.

Goal → Reduce cost, labor, and waste without compromising food quality

Measurable Performance Gains

Sustained Oil Quality (TPM %)

Oil Replacement Reduction

Fewer oil changes mean a direct and substantial reduction in purchasing volume.

Oil Lifespan Extension

1400%

From a 1-day cycle
to 14 days

Monthly Labor Reduction

360 Hours
Saved

less boil outs and oil changes decrease injury risks and complex procedures occurring in the kitchen. Valuable time is returned to the team, boosting morale and enabling a greater focus on service

Financial Impact Analysis based on 14 days projection

The data is clear: Beyond Oil is not an added expense, but a strategic reallocation of costs that generates significant net savings. By drastically cutting oil and labor costs, the investment in the filtration aid pays for itself and then some, every single month.

Total Monthly Savings

€2,795

Per Store

Total Annual Savings

€33,540

Per Store

Financial Impact Analysis based on 6 days of pilot

The data is clear: Beyond Oil is not an added expense, but a strategic reallocation of costs that generates significant net savings. By drastically cutting oil and labor costs, the investment in the filtration aid pays for itself and then some, every single month.

Total Monthly Savings

€2,412

Per Store

Total Annual Savings

€28,948

Per Store

Oil Lifespan Extension

600%

From a 1-day cycle to 6 days

Total Annual Savings

€260,532

Per 9 Store

The Cascade of Qualitative Benefits

True operational excellence creates a virtuous cycle. The improvements measured in the kitchen cascaded into tangible benefits for both guests and staff, enhancing the brand experience from every angle.

For Guests

- ✔ Better-tasting food, consistently
- ✔ Fewer complaints and returns
- ✔ Dining area free from burnt oil odors
- ✔ Food out of the door arrives home
- ✔ Maintaining crispiness and tasting better

For Kitchen Staff

- ✔ Noticeably better kitchen air quality
- ✔ Less lingering smell on uniforms and in the workspace
- ✔ Safer and simpler oil management routines

Goal → Create a safer, higher-performing kitchen environment that drives guest satisfaction, employee well-being, and long-term brand loyalty.
